

More clarity. From intake to results.

Your workshop, connected to the entire repair process

iBoss Orange brings together cases, planning, people, quality and financial processing. Stay connected to clients and dealers while keeping control of the repair.

Client • Driver • Dealer • Repairer
Together in one integrated platform

The car back on the road. The case in order.

A case that moves with the work

Information from intake, estimating and repair stays connected. The next colleague can build on what has already been recorded.

1

A complete intake

Create a case with vehicle and customer details, damage, insurance and planning. Add photos and documents, including directly from the iPad.

2

A workable schedule

Align arrival, repair and handover with available staff. Include leave, replacement vehicles and transport.

3

Repair with a clear overview

Let employees record time against cases and activities. Checklists and quality checks guide the work and capture answers.

4

An informed close-out

Compare the estimate, recorded hours and purchases. Check what remains to be done before handover and invoicing.

From the first photo to the final check: one shared case record.

Clarity in planning. Visibility on the floor.

See what is arriving, what must be ready and who is working on each case. Workshop recording fits everyday practice.

Straightforward time recording

Select the employee and start an activity. Starting the next action closes the previous one. Multi-case time recording is enabled per employee.

Keep hours accountable

Review the day on a timeline and make corrections with the appropriate permissions. Configure automatic breaks and start/end adjustments to match your agreements.

Manage replacement vehicles

Reserve a vehicle and record issue and return with date, time and mileage. Scheduling conflicts become visible.

Involve your team

The personal portal provides employee details, leave and competencies. The daily view shows recorded work and any remaining gaps.

Planning, people and vehicles in one connected overview.

Good work. Evidence recorded.

Support applicable BOVAG standards in everyday work. Collect evidence during the repair rather than waiting until an audit.

Standards and competencies

Record applicable standards and qualifications. See whether required competencies are available and when certificates expire.

Activity-based checklists

Ask questions when an employee completes work. Record answers, comments and supporting case photos.

What still needs to happen

See outstanding final checks, documents or vehicle actions. Configure each control to inform, warn or block.

A traceable case

Keep a record of who performed a check, the supporting evidence and when an authorised exception was granted with a reason.

Quality becomes part of the work, not just the paperwork.

iBoss Orange supports standards monitoring and audit preparation. It does not replace BOVAG certification or an independent audit; assessment includes automated and manual checks.

Know your result before you invoice

A full workshop does not tell the whole story. Compare the estimate with recorded time and confirmed purchases in the same case.

Estimate and revise

Use available external estimating integrations or built-in calculators for areas including universal repair, wheels and hail damage.

Parts and purchasing

Transfer available parts into an order. Review incoming purchase invoices alongside the case estimate and post through the configured accounting system.

Hours against expectations

Track time consumed against the estimate. View it per activity where the source supports this, with clear signals for overruns.

Invoicing and customer contact

Review costs and margin, compose the invoice and use your letterhead. Send documents and follow up on customer satisfaction after handover.

Assess a case without waiting for the monthly report.

Automatic transfer depends on available source data. Financial processing uses the configured permissions, rates and accounting integration.

MAKE IT WORK FOR YOUR ORGANISATION

See your workshop in iBoss Orange

Show us how you work today. We will walk through a case that fits your business, from intake and work order to cost review and handover.

Your daily workflow

Case creation, scheduling, time recording, photos, parts and replacement vehicles.

Your quality agreements

Checklists, competencies, case controls and an evidenced final inspection.

Your financial close-out

Estimates, hours, purchases and invoicing using your own configuration.

Experience it for yourself
